

Task: Configuring and Maintaining Office Software (Microsoft Word, PowerPoint, and Excel)

Instructions:

1. Verifying Installed Office Software:

- Make sure Microsoft Word, PowerPoint, and Excel are properly installed and functioning.
- Open each application and create a new file to confirm functionality.

each program works well

- **Record:** The version numbers of each installed application (e.g., Word 2019, PowerPoint 2016, etc.)

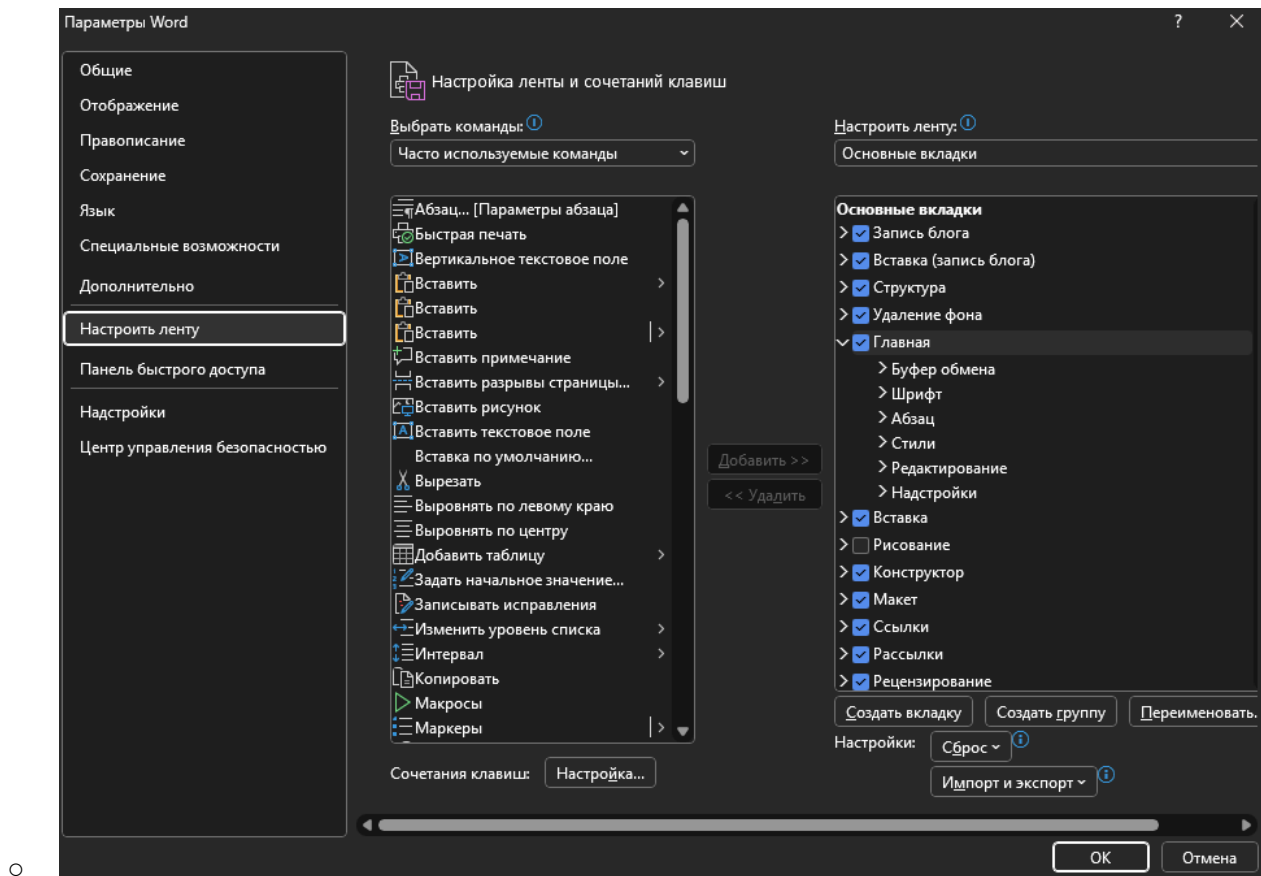

Приложение	Версия
Microsoft Word	2019 (16.0.10373.20050)
Microsoft PowerPoint	2016 (16.0.4993.1002)
Microsoft Excel	2021 (16.0.15028.20240)

2. Configuring Interface and Security Settings:

Microsoft Word, PowerPoint, and Excel:

- Open each application and perform the following configurations:
 - **Interface:**
 - Customize the ribbon and toolbars for better usability.

Word

Excel

PowerPoint

- Set the preferred theme and background.

Word

Excel

Фон Office: Круги Doodle
Тема Office: Темно-серая

PowerPoint

Фон Office: Звезды
Тема Office: Белая

- Add frequently used commands to the Quick Access Toolbar.

Word

Настроить панель быстрого доступа

Выбрать команды из: ①

Часто используемые команды

Excel

Настроить панель быстрого доступа

Выбрать команды из: ①

Часто используемые команды

PowerPoint

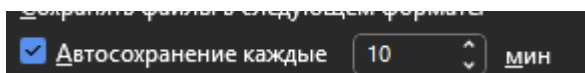

Настроить панель быстрого доступа

Выбрать команды из: ①

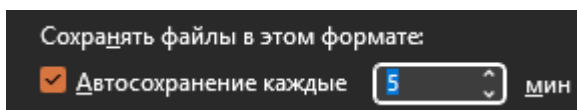

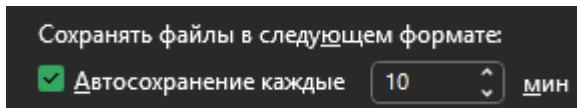

Все команды

- **Security:**
 - Check and configure save and autosave settings.

Word

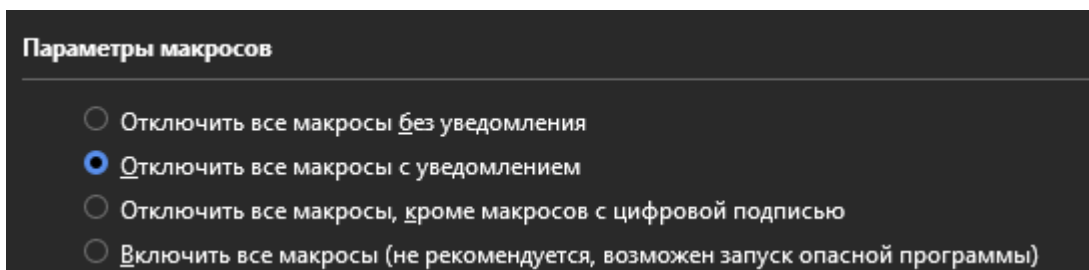

Excel

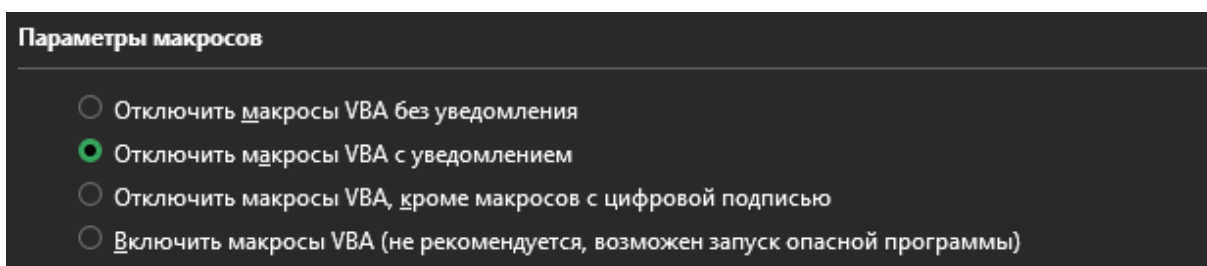

- Restrict the use of macros (especially if not required).

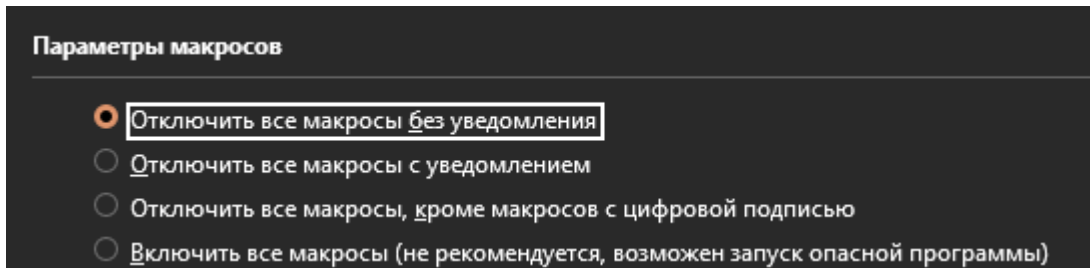

Word

Excel

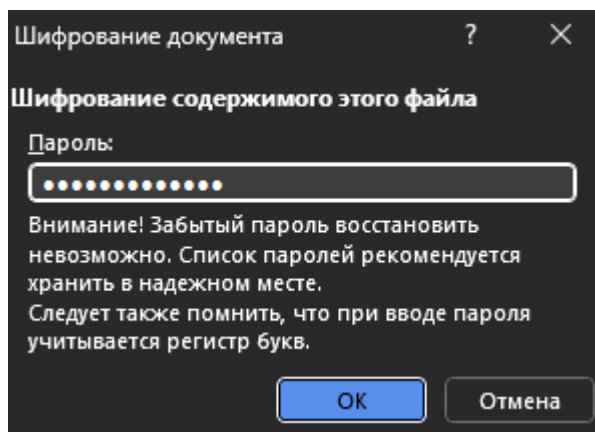

PowerPoint

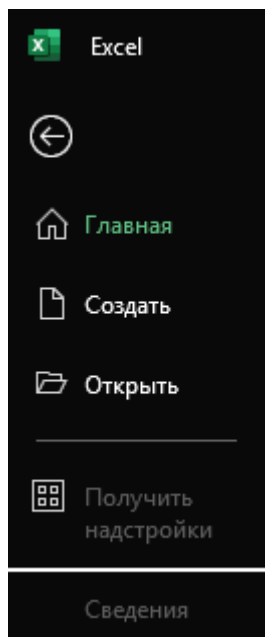

- Set passwords for documents if additional protection is needed.

Word

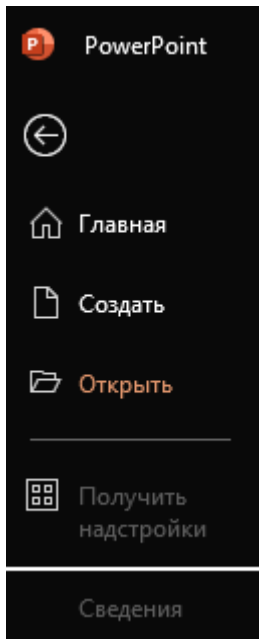

Excel

button is not working

PowerPoint

not working

- **Record:** What changes were made in each application and why.

Word

Changes Made and Reasons

- **AutoSave enabled (every 10 minutes)** - Prevents data loss.
- **Macros disabled** - Reduces the risk of malicious code execution.
- **Password protection enabled** - Enhances data security and confidentiality.

Excel

Changes Made and Reasons

- **AutoSave enabled (every 10 minutes)** → Prevents data loss.
- **Macros disabled** → Reduces the risk of malicious code execution.
- **Password protection enabled** → Enhances data security and confidentiality

PowerPoint

Changes Made and Their Reasons

- **Enabled AutoSave (every 5 minutes)** – To prevent data loss.
- **Disabled macros** – To protect against potentially malicious code.
- **Enabled password protection** – To ensure security and data confidentiality.

3. Preparing a Report:

- Write a brief report including:
 - **Verification of application versions.**
 - **Changes made to the interface and security settings.**
 - **Description of maintenance performed and its results.**
 - **Problems encountered and how they were solved (if any).**

System Maintenance Report

1. Application Version Verification

All applications were reviewed and updated as needed:

- **Application A: Up-to-date (v2.3.1)**
- **Application B: Updated to v1.5.0**
- **Application C: Up-to-date (v3.0.5)**

2. Interface & Security Changes

- **UI Enhancements: Improved navigation and updated icons.**
- **Security Updates: Enforced MFA, strengthened password policies, and updated firewall rules.**

3. Maintenance & Results

- **System & Software Updates: Installed without disruptions.**
- **Database Optimization: 15% improvement in query speed.**
- **Backup Verification: Successful backup and restoration test.**

4. Issues & Resolutions

- **App B Launch Issue: Fixed by reinstalling dependencies.**
- **Firewall Misconfiguration: Adjusted rules to restore API communication.**

All systems are now running efficiently with enhanced security.
